

Senior Product Designer

Fintech • SaaS • Enterprise Platforms

PROFESSIONAL SUMMARY

Senior Product Designer with **7+ years of experience** redesigning and modernizing enterprise SaaS, fintech and auction platforms. Specialized in data-dense interfaces, operational workflows, design systems and accessibility, collaborating closely with product and engineering teams from discovery to implementation.

EXPERIENCE

Senior Product Designer — Viaro Networks / Frontstream

Apr 2022 – Present

- Led end-to-end redesigns and refactoring of legacy fintech and auction software, improving consistency and reducing UX friction across operational workflows.
- Designed dashboards, reconciliation, settlements, batches, ACH and reporting workflows.
- Created reusable patterns aligned with PrimeNG and design system standards.
- Partnered with Product, CTO and Engineering teams from discovery to release.

UX/UI Design Analyst — Global Hitss

2020 – 2022

- Redesigned operational modules for an enterprise telecommunications platform.
- Conducted research, information architecture, prototyping and usability testing.
- Collaborated with Product Owners, stakeholders and developers throughout the delivery process.

BiddingForGood — Public Auction Platform Redesign

<https://auction.biddingforgood.com/>

Led the complete redesign of the public auction experience used by event organizers, donors and bidders, improving navigation, information architecture and responsive usability.
